

## The Reign Ease™ device with patented SemiCera™ technology enhances behavioral compliance in horses.

Horses have large rigid muscles, but their sensory feedback is greater than in humans. When placed on the poll, the device uses ambient heat from the animal to passively activate the embedded far-infrared ceramics. The subsequent emitted photons stimulate the cerebellum, which in turn affects the body-to-brain messaging. This relaxes the proreceptive neck muscles where they connect to the skull. The more relaxed the horse is, the greater compliance to commands the owner will see.

## INSTRUCTIONS

### Application

- 1 Ensure the device is clean before each use.
- 2 Shave the bridle path.
- 3 Place the device with one ceramic above the bridle strap.

The device begins to work within 20 minutes after placement.

**Note:** 30 minutes of wear time is recommended prior to competition. Place 1 hour prior to competition if not wearing the device during competition.

### Cleaning Your Device

The device can be wiped down with dish soap and water or an antimicrobial cleanser or disinfectant.

### Recommendations For Use

There are no contraindications for this device.

Use of this device will not interact with any medication.

Never place ice therapy on the device.

Use only as directed. For any questions, please call **610.215.2004**.
